danpaul88 wrote on Wed, 08 October 2008 15:10Hey, bet you could never have guessed that from my forum login name. In my opinion players who use loads of different names are probably trying to hide something, like the fact they are a known cheater or someone who was banned from a server for some other reason. Why would you even NEED more than one login name, it's not as if you can play against yourself...

...or when you just want to play the game without people asking you all sorts of admin questions etc.
