Looking through your dxdiag, I noticed that your graphic drivers are out-dated.

You can download the current version here for your card:

http://www.nvidia.co.uk/object/winxp_2k_93.71_uk.html

Make sure to remove the old drivers first.

Start.

Control Panel

System

Hardware

Device Manager

Display adapters

Double click card > Uninstall.

Reboot Computer.

Install new driver.

Reboot Computer.

Back to the other problem, just re-install DX.
