---

I could certainly use some help with my mod. It has been in development nearly 2 years I think. I'm on the brink of finishing it only there are certain issues that I'm unable to fix or that I didn't learn yet. (like ligtmapping)

It is for the nitromod you might have heard about it, if not then I will give you a tour in it

I have modeld this advanced powerplant after one screenshot of westwoods advanced pp. Although it looks kinda finished well it isnt ;p

If you could lend me a hand on this mod then it will be finished soon. Instead of that I will be trying to finish it on my own. (it is just to big for me alone atm)
