---

I was thinking the other day about making a mod that was just sniping say like C&C Sniping.

I don't have space on this hd but when i get my desktop back i will be able to start working on it, but there would be like a list of stuff needed I don't know how to do much stuff but i have been trying to learn.

I have made some mistakes in my past i wish everyone will forgive me for that.

2 sniper's on both team's like there is now a more better looking sniper's tho

So let's make a list of stuff that would be needed.

Sniper rifle's

Maps

Textures.

Pistols

prone, crouch, standing

Towers and such

I'm lost there so add more to the list.

But i thought about this while talking to a friend.

more idea's would be nice.

And again this would only be able to happen when i get a new desktop or my old one back.
