To point out to everyone mark was the only person to trust on xphaze her mad scripts for the site,irc,ts and etc so hes someone to trust. Xphaze is pretty much dead (thank god), But he had some really cool scripts im hoping are in this zip.

The infantry only serv was one of the best, All buildings but no harv or tanks only infantry with stronger mines and no defenses which is fucking awesome, Something to consider when looking at any inf. scripts inside the zip.
