As shown here

<http://www.i-hacked.com/content/view/181/48/>

My question is how can I make the voltage stronger? I dont know anything about electronics like this....Like a noob first thing I thought was put 9v battery then a double A

Why not try making Hydrogen with a car battery here you go kids just don't get yourselfs killed

I really like this website I have been going to it for quite a while now about 2-4 years now and I find it to be very interesting try it.

Thanks for linking me to that, I'll be back in a few years when I'm done running from the FBI.

Make sure to check back on C&C Reborn vehical beta, oww wait, it is scheduled to be released in 2040 nevermind.

2040!? Are you crazy?

It's been delayed to 2050.

Very unlikely, I hear that the current "Updated.". release date is now 2080 but at least they will be almost finished with it.
