Crash wrote on Tue, 28 October 2008 05:29Hey I play on the demo server RxD and when I try to use the updated version it cuts me out and renegade is having an error.

I'm not fully sure what it is but I know the newer ebon.dll file is where the trouble lies at. Could you maybe run like you did on the beta with the features of the updated one?

Buy the freaking game, it's just 5-10 \$...
