Very simple example:

1. open notepad
2. save file as index.htm
3. enter this code

```
<html>
<head>
<title>This is my website's title</title>
<body background="yourbackgroundimage.jpg">
</head>

```

```
<br>
```

Type text in here and ``use these to make it bold`` or `<i>`these for italic`</i>` or even `<u>`these for underlined`</u>`. A "BR" equals "enter":

```
<br>
```

```
<br>
```

New alinea here ;). ``Font tags allow you to change many things, like for example the color``

```
</body>
```

```
</html>
```

4. save file and double click it.

I hope this helps.
