Hi everyone! I'm having a tad of bother trying to get scud storm to work. I had gotten the file through [www.FileFront.com](http://www.FileFront.com), the file I got was a separate rar file (256mb in size). I had sent it to the renegade/data directory but it's not showing up within the mods section when I go to test it out in a LAN game.

I don't know if I've sent it to the correct folder or if it's a corrupt file or whatever. Any help or links given would be greatly appreciated!
