Thats ok, I appreciate you trying to help me. Lets hope dp88 happens to come accross this topic lol! I don't use this board very much so I don't know where to catch him.

Anyway I'll look about. See what may be able to either repair oe update my current string.dll file. I tried regicure but it hadn't helped. I'll figure it out at sosme point hopefully.

I also have a problem with Ren Alert, I need a woIDATA.key file which I DO have in my Renegade folder.
