cheesesoda wrote on Thu, 20 November 2008 13:33As Canadacd pointed out, you can shoot it while running and standing up. Try doing that with a .50 cal rifle. Let's not forget you can shoot lightly armed opposition in the foot and kill them.

So can real weapons actually, the shock of the bullet entering at such high velocity forces can cause heart failure due to the blood being forced back towards the heart by the shock... or something along those lines anyway, I don't remember fully, but it's called hydrostatic shock.
