Heh. For those who do not know. Avatar's are the little people you control.

The short answer is no. You have to accept whatever your character looks like when you purchase him.

I think using an old man so you can have a volt auto rifle is worth it.

However if you MUST have them look different, there are a variety of skins you can download to change the appearance of just about everything in the game.

Try <http://www.cncammo.com>

They have a lot of skins. Although not the only skin site, it is one of the largest
