If you truly have no budget then I could turn that into like £6k lmao.

Anyways just want to point out a few things before I update this in the morning as its nearly 2am.

CPU: Intel C2Q 45nm Q9550 Overclocks VERY well and you'll get the same performance from it as if it was a £600 CPU

GFX: XFX GTX280 XXX This card is the card to get and if you run it in SLI then even better but I dont really see the point

Case: Coolermaster RC1100 V2.0] This case is HUGE. It comes with 3x120mm and a single 200mm Fan. It even has a Hexus report.

I will add other things in the morning.
