I would of course support new maps, as long as they didn't have any drawbacks, such as major, unfixed bugs or something of the like.

For some reason, something that always stuck in my head from a long time ago was Devinoch telling the community of his idea for a map, and how he was going to try and have the map team make it and patch it in...

I still remember the premise of the map, too...C&C_Crater, it took place inside a Tiberium crater, with a Mutant Lab in the middle.

Strange, the things that I remember, eh?
