hmmmm, well Fobby or someone else wont share any models/features out from Renegade-X (i PMed him about some new render of GDI barracks, but he fucking ignored me and my Pms)

He doesn't ignore lol...his Renforums nickname has brackets []...and this prevents your PM from getting to him...it's a forum glitch

That's probably why he did not respond. You should PM him from the Renegade-x forums.

If you PM'ed him from Ren-x forums and he ignored, then lol you are outta luck

BTW, very nice renders!! I love the one with the TD light tank
