---

I am getting my site to gather.

Here is what i need help with,  
is there away to take content from let's say a new's forum like invisionfree where the portal take's content out from what ever topic you want it to.

I'm making my home page in html and I'm using PHPBB3 forum's

And i would like to take new's off the board and into the home page, is there some script or something out there that will help me.

I have been looking through Google for 2 day's know i have been setting up my forum and site for 3 day's now.

please and thank you.
