4) Why is it on some maps the OB won't fire in all directions?

The poor making of the map (no offense). The obgun (the actual weapon) is separate from the obby, so if you place it wrong, the gun won't fire behind the obby, b/c the obby will block it. If that doesn't answer your question, post a SS of the obby not attacking you, but you still being able to see the tip.
