BearxorYanoABDII0suklol, I understand none of this computer talk

If you don't understand that can you understand this? "I just finish lapping my HS and put a new coat of Arctic Silver 3 Thermal Compound"

What do you consider lapped? I use 300-400-600-800-1200-1500 for a great mirror finish, but I know alot of people stop at 800.

I go all the way to 2000 200-400-600-800-1200-1500-2000

spreegemWhat does HS stand for?

HS=Heat Sink
