MRLS dominates, multiple rockets for spread effect or for concentrated fire, and if a something pulls up next to an ARTY it's useless, while a MRLS has a SLIGHT chance but having the rockets fly up behind it and comedown around it, and the rockets track someimes.

Stank, Mammy is slow as hell and can't attack close range very well, so a stank could sneak in and whip it since the barrels of the mammy are too long and the tusks can't hit that close.
