Yanol love thinking about time travel(its good exercise for the brain) I don't think its possible, if time travel was some thing that could be done, why haven't we been bombarded w/ "tourists" from the future? And if time travel was possible(its not) you could NOT meet yourself, you can't be in two places at once.

I could give several reasons:

1. If you can change the past: Time machines would not be open to the public. If you could change the past, time machines would have to be VERY strictly regulated, imagine what horrors could be done.
 2. If you can't change the past: It's obvious, then, why we haven't seen toursits: because us seeing them would change the past.
