Nukelt15 wrote on Thu, 08 January 2009 12:43I'm still laughing myself silly at R315r4z0r's explanation of why repeatedly pressing buttons isn't an inconvenience. You need a finger to press it with, unless you use your toes or your dick, and that finger has to come from somewhere. Let's see... The right hand is on the mouse, and the left hand is covering W, A, D, Shift/Ctrl, and the Spacebar.

Which finger would the guru suggest we relocate so as to not uncover one of the controls vital for movement, shooting, etc?

I'd suggest the right hand's thumb, to press the mouse's thumb buttons (MOUSE4/5, or letter keys if reassigned via the mouse's software)
