SomeRhinoBackwards time travel cannot be achieved from what I understand, but you can "travel" forward in time through some form of gravitational or velocity time dialation (where your frame of time would go slower than other parts of the universe,) although you wouldn't be able to return.

It has been theorized that the reverse flow of time caused by achieving a negative velocity can also be attained by travelling at the hypervelocities of light. Therefore, theoretically, backwards time travel is possible.

While we're on the subject... <http://www.beaconpedestal.com/back.mid>
