^ I'm pretty sure the official MP maps are all like this.

Can people who posted their fps please edit their posts to include their computer specs if you haven't already? I encourage other people to test it out as well. Wait until you've been running around for more than a minute (all the textures should be loaded) and tell me your avg fps (and comp specs!). I've decided I am going to try and do VIS sectors and I need more info.
