R315r4z0r wrote on Sat, 10 January 2009 19:34I've actually had a use for this glitch before..

I was on a server where you were able to repair destroyed vehicle shells. Well, someone lost a medium tank in front of the war factory. They were repairing it when another med came by. The repaired tank spawned inside of the other tank and they were both stuck there. We couldn't destroy it normally because FF was off.

So I used this glitch to destroy the tank and free them.
