WelshSpartan89 wrote on Sun, 11 January 2009 14:49 and now ive installed scripts 3 and ive got the black screen. ive tried downloading all the latest direct x software from download.com, but i still have the black screen, could it be to do with vista or is there a direct x for vista only???, soz 2 be a pain in the ass but i really want to play renegade

if anyone can answer my two questions above that would be v helpfull. however im hoping by installing scripts 3 manually ive answered my own 1st question but thanks to the black screen i cant even find out!!!!!!!!!!

When is your black screen happening? Can you see the menu?

If you can't, reinstall scripts 3.4.4 with the installer. It handles any problems with DirectX you may have and generally gets you produces a working install of Renegade
