Subject: Cannot log onto Renegade!
Posted by FL4M1NGCH1CK3N on Sun, 25 Jan 2009 21:40:36 GMT

Hello, I cannot log into Renegade. My in-game name is FL4M1NGCH.

I have been trying for a few weeks to log onto Renegade for a few weeks. I log in, then click on the server I want to go onto (I am a regular on n00bless, but I have tried with no avail logging onto other servers). After that, it loads the normal screen:

After about a minute or two, I get this message on the screen, and then log out:

I posted my problem on the n00bless forum, and they told me to download RenConnect. I did, but it still did not work:

  (notice the "connection to server interrupted" message at the top of the screen.

I don't think anything is wrong with my router, as I have been playing Ren since May on the same router. HELP PLEASE!
