
Subject: How to remove single player mission results?

I have the First Decade edition of Renegade, if that helps at all.

Basically, I want to know how to delete the single player mission results you get when you complete a level. If you go into Load Game from the main menu it will display all the levels you have completed with your star ranking next to them. However, it won't let me delete these and I really don't know why?

If I make a quick / manual save, or if the game makes an autosave, I can delete those from the Load Game menu, but not the entries I just mentioned.

I have tried looking under the Save folder in the Renegade section of my Program Files, but these entries are not displayed here. I have also tried reinstalling the game, but they still appear?

If I delete the files that correspond to the mission entries ('MO_Tutorial' for the Tutorial entry, 'MO1' for the first mission entry etc) then the entries are finally removed, however then I can't play the mission because it just crashes.

I know that it doesn't really matter, but I just wanted to wipe my entries clean and start a new game from a fresh; I'm fussy like that!

Anyone know how I can do this? Thanks in advance.
