I've been the Origin Creator of that mod and since 2009 i started to work on its "relaunch". due to the fact that i got new pc and my renegade cd's has been damaged i had to buy it again but finally with the beginning of 2009 i started. there was some stuff i lost and so i had to rework many things but atm i guess the mod includes now everything it had before except for playable maps (only 1 for now). i am alone and could need all the help i can get with modding/testing. my plan was to make it public from the beginning this time so everybody can test and give me inspirations ideas or something to include. hope for positive reply.

I've added you on messenger.
