u6795 wrote on Tue, 27 January 2009 21:22: I dunno about you, man, but that's kind of awesome. Not if you are in motion. When you change the camera angle, there clipping errors between two seemingly different textures all over the weapons and the vehicles.

Those black spots change their positions when you move so it looks like total crap. And I don't know how to use that shader edit thingy.

How do I return the vehicles to normal?
