yeash! ok ok! I just suck at W3D modleing (i'm good at sketch up though   ), know nothing about dll scripting (know about txt\ini scripting and HTML, and DOS, but all those are uselles for the mod), and aren't too good at textures, but I can do textures. So, I guess I will ask to be a tester and to be an aid to a texture person.

=samous
-can't make a website for you though, sry. Actually learning HTML now, literally taking a class on it (for collage credit)
