This full radar thing is nothing but a brain-fart inducing distraction. Lol, seriously, if someone can use that full radar (the one shown in the video) in an online game, use it at a glance, and make good use of it, I will personally buy an airline ticket, go to their house, and pat them on the back.

When I was watching that video, I couldn't make heads or tails of what direction he was facing, where those little dots related to other people on the map, where most of the little dots where (because of all the jumbled moving text), and whose little dot was whose. Not to mention the fact that it completely blocked your field of vision.

I don't know about anyone else out there, but I couldn't read that thing and play Renegade at the same time even if I spent a month practicing...
