exact position of a player, and if you change the radarmode you can see whenre the enemys are hided

you sir fail. Hard

its HARDCODED to only display info IF the object is on the same team.

It's irrelevant.

If i read correctly, the original problem with it isn't what was hard coded into it, but it shows what can be done, which means someone could now know, or even could be in the middle of creating one that shows where the enemy players are, whether they're in a vehicle etc....and it will keep expanding.

I don't think anyone sees the version shown on youtube as a cheat.

Just drop the issue. We all (I should hope all) have seen this argument and similar about cheats. First it's building health bars, now it's full-screen radar. What next are we going to argue about? Who cares if he makes it? As he stated, he just did it to learn how. He has NO INTENTION of releasing this nor the source to the public.
