Maybe as part of the built in anit cheat make it so server owners can limit what changes to objects. are allowed into the server?

like lets say that theres a setting to allow objects.
that have changes only in

- laser beam color (ob and laser rifle)
- radio commands
- etc

well no matter what it blocks things such as

- damage hacks
- splash damage
- no screen shack
- ammo hack
- ect

so use modders that want some custom stuff ingame can have it without it being a cheat
