Hi.
Id like to optimize my renegade gameplay by changing my Aim icon and potentially some other stuff.
However, I got this Winrar with Renegade Addons and skins from Filefront (see screenshot) but I dont know how I make these files work. There was no explanation with the winrar, only a notepad saying its downloaded from www.jelly-games.net/.
Anyway when I want to download skins from jelly I cant reach the skins or im to stupid, not sure .
Any help?

Thanks.
