BlueThen wrote on Sat, 14 February 2009 20:49 Looks the same in my IE as it does in chrome. A really pixelated image that says something about "security."

What'd you do to IE to make it not be insecure, then? It's supposed to be just a lame image in GOOD, secure browsers, but in my IE (and as is the intention), it's one of those stupid rickroll pages that moves about the screen.
