rrutk wrote on Mon, 16 February 2009 06:03 We should have a simple WORKING script:  
Display\_Message\_Custom\_Team\_Sound (to display a textmessage for seperated NOD/GDI  
teams on custom and play a sound).

Just FYI...

JFW\_Message\_Send\_Custom

Display\_Message - the message to display

Red/Blue/Green - RGB colour codes to send a coloured message

Sound - Sound to play

Message - Custom event to trigger on

Delete - Whether to delete itself after it's been sent. (defaults to false(0) I think...)
