bisen11 wrote on Fri, 27 February 2009 18:25 It seems everytime I get back into doing so mapping and it happens to be on a new HD, I always have a hard time finding that huge folder full of all kinds of textures for Ren. I know it was a seperate download from the other renegade tools and it was on the westwood FTP (is that still up?). Anyways, it'd be nice if a link to these could be put in a sticky. So anyone got a link to download them?
Why not just extract every dds from always.dat?
