reborn wrote on Fri, 27 February 2009 03:46The Bible is quite clear when it comes to the age of our planet, and places it at about 6000 years old.

A commonly accepted age amongst scientists places our planet to be at approx 4.5 billion years. If you're Jewish, or even Christian, does this mean you accept that the Earth is 6000 years old, and scientists are always getting it wrong? Or do you accept that the Earth is older then it states in the Bible, but just choose not to think about it?

The more general question to ask if they have actually read the bible once.
