I've been running the Ren mod tools on Windows 7 beta since it came out, and I haven't had any problems yet.

Aside from the shitty constant crashing of level edit, I assume?
lucky you, my level edit does not start up any more at all, always crash, reinstalling does not help (i think i changed render device settings)
Have you tried running it in different compatibility mods and so forth?
no i didn't
EDIT: IT was set to disable visual themes, but compatibilities don't work ..   how do i bring the chose render device screen

Use Regedit, I'm sure its saving it in the program's registry if anywhere.
yes i thought so, but i can't really find it there, i'll look one more time
