I played this game till the end. It is quite short indeed but it is a great game. It's nicely detailed (if you play on very high settings) although using the Nvidia PhysX will (if you didn't patched) always crash the game. That way you get stuck at checkpoints which he won't save so you have to start over again.. LOL! But anyway it's finally something different

BTW: you all knew it is made on the UT3 engine from Epic Games??
