For the 5000th time:

If you had scripts 3.4.4 installed (Which if you followed the installation guide found here then you did) then:

If you install Renguard, the default settings lead to you installing Core Patch 2.

Core Patch 2 installs an old version of scripts (something like 2.7)

These do not support the newer DirectX9 rendering system that the 3.X series does. This causes an incompatability that results in your screen being black. This is remedied by:

REINSTALLING SCRIPTS 3.4.4

I hope that was clear.
