(the original author is ivanxxx check out the nitro readme "searchterms turbosquid for sci-fi sniper rifle, or just sniper rifle")[And the meaning of turbosquid is to buy or free to use stuff] And the beauty is everyone can use this ramjet.

The meaning for that ref is that anyone can use it. Model something different out of it and not for your use only. You just seem to love that with anything. You know what? Even after this I keep my promise to not release the hud you made for me even that I want to do it.

I dont think it is a wonder that people stop helping you.
Really you seem to do this crap with anyone.

Also that serveradmin message discus that with the admin that kicked you not me...

i was just joking (old timez ehh?) all ok now, i'll made new hud and new ramjet for you later..Dont know, maybe redone that turbo squid one/add stuff..
And you know, im working only with server/wol side stuff

and here nod's ref version (perfected also)

and by the way, how i can discuss the serveradmin message with that dude if i realy dont know his fucking problem? Can you tell him all that?

p.s. you have converted havoc's hands with EVA device from single player into multyplayer??
