EDIT: Oh, hey, does anyone happen to notice the doors he uses on the Refinery and Ob and such? Take a close look, those are doors from APB, blatantly stolen without giving any form of proper credit.

I converted them and released them and credited team Reborn. I also converted the APB door but scrin is the only one that got it from me.

Also I was the one putting lights on the field map, adding those tib crystals on the tiberium field and smoke. Scrin added some tiberiums on the wall, which don't look very good i have to admit..

GDI refinery exterior was made by me using samples from Beta tiberium refinery, scrin added 3 logo's and a little runlight

Just making clear what I made and what he made
