Thanks for the help. Only two problems I have left.

I can drop the anti repair gun but not the mendoza gun for some reason.

I was wanting to drop the SP sniper rifle that has a red tracer too. But it didnt show up. I entered all the sniper rifle entries in my drop script figuring one of them would be right. but it didnjt drop.

And as for animations. Will it be c-130 or cargo plane or something along that line in its title?

Also. How do you make a helicopter drop off your bots?
