Gozy, this "DELL" is most probably the computer name that loads up during LAN play IF you choose not to type in a custom nick while setting up the game.

My computer's name is "ULTRA". Whenever I want to play a singleplayer LAN game (to test skins) and click on Multiplayer LAN in the main menu, the next screen shows the field to enter in a custom nick. Unless you have changed it before, this field has the computer name by default and for me it is always ULTRA. It is always in caps.

That could be the case here.

EDIT: DutchNeon already mentioned this in the first page:
