After months of downtime due to new host, domain name, Kresin being lazy, etc., we finally have our site back up, but without most of our content . We're rebuilding our old features, and adding in new, like a tutorial section. Dri Reign host the Sole Survivor mod, the RA2:Vengeance mod, and all the other nifty things created by Dri Reign. Check us out at our new link www.drireign.com. If you think you could help us rebuild in any way, give us a shout. Check back often for updates and progress on the site.
