This is a plug-in designed to work with SSGM2.02 for cnc\_renegade.  
It was written by reborn from MP-Gaming.COM (fm\_reborn@hotmail.com).

This is the first release version and probably has some bugs in it, with feedback I will fix bugs found.

This plug-in allows players sell there vehicles using a chathook. The following are acceptable strings for players to type:

!sellveh

!SV

!SELLVEH

!SellVeh

!sv

!sellvehicle

!SELLVEHICLE

!SellVehicle

The vehicle locks itself and ejects all players when this happens, but if the vehicle is destroyed or stolen, or your re-enter the vehicle, then it halts the sale.

The server owner can configure the percentage of money refunded to the player in the SellVeh.ini file. It's default is 0.5.

The server owner can also set how long it takes for the sale to complete, this is currently set to ten seconds.

I don't run a renegade server, I have no real use for this plug-in and have made it for the sole reason to help other server owners.

If you use this plug-in and modify it, if you see a problem, either tell me, or preferably submit code. Don't be selfish, release the source code.

I believe it is only with this attitude that Renegade will continue to keep it's diminishing player base.

To use this plug-in, refer to SSGM.ini in your SSGM2.02 server folder.

You'll need to add the .dll to the server folder, and make an entry in the [Plugins] section, mine looks like this:

```
[Plugins]
```

```
01=SellVeh
```

You will also need to add the SellVeh.ini file to your server folder.

I urge you visit my forums and my site @ MP-Gaming.COM. I would also like to direct you to Black-Cell.NET. There is a history of this game there that most people are oblivious to, and without Black-Cell, none of the feature rich servers we have today would be here. They also have a renegade server

back up and running. Be sure to find it in the WOL server listings and join. It's hella fun.
