Good-luck on your project

1. Do you believe in a god(s)?

No. We live in a biological world.

2. How did you come to this conclusion?

My parents are religious and I went to church as a child. Religion doesn't answer questions it simply avoids them. Science answers questions and proves what I believe to be the truth.

3. What does a god come off as in your opinion?

God to me is a way for people to cope. It provides a source of hope, not being alone and understanding when all seems lost.

4. If you do not believe a god(s), what do you put your belief in?

I firmly believe in myself. I have the ability to accomplish what I need to.

5. What do you think is your personal purpose?

I'm a biological being. My purpose is to reproduce. My goals are not exactly the same as my purpose. That's what makes me an individual.

6. How did you come to this conclusion?

Life is in front of me presenting challenges all the time. I get through them and push to succeed. Overcoming challenges is the basis for life so why should I expect anything else?

7. Are you satisfied right now with who and where you are?

I am. I can't change who I am and I don't want to.

8. From what do you find most satisfaction?

Making accomplishments.

9. Why do you find most satisfaction from that?

Seeing my skills produce something.

10. Do you ever doubt who you are?

Never have and I don't have a reason to. Matter is matter.
