ROFL as if your still going on about how SK gave me the irc overlay/map overlay.

I can't wait till he shows up to this thread, insults my stuff (it's expected) as well as insults your ignorance.

*edit - Also SK is a programmer, not a scripiter which I'm sure he'd bitch slap you for calling him that

SK was the first one to do the map overlay, oh so long ago, and I give him full props and respect for the idea of it.

The implementation is my own code written in shaders.dll .. so fail more.
