Aww, poor little IAmFenix won't be able to use his custom Bighead anymore

Well, guys, seems clear to me that we should stop developing TT, cuz otherwise IAmFenix will be pissed

I'm glad the models will be blocked again like they were with rengaard.

I'm tired of people running around with glowing c4, see through doors and pink panther characters, and not thinking it's a cheat or HUGE advantage

or they just have hd weapons that have no wep collision are the same size. and some character changes
